### Tree Plantation Drive in the Adopted Village by Dumkal College NSS Unit

The tree plantation drive was meticulously planned and executed by the NSS unit under the guidance of Manas Kumar Das, the NSS coordinator. The objective of this initiative was to contribute towards environmental conservation and promote greenery in our adopted village. The participants, including 3 teachers and 75 enthusiastic students from Dumkal College, gathered in the village early in the morning of 3<sup>rd</sup> July, 2018.

#### Activities Planned and achieved:

1. The event commenced with an inauguration ceremony attended by local community leaders, the college principal, and the NSS coordinator. The principal-in-Charge of Dumkal College, Dr. Debasis Bandyopadhyay delivered an inspiring speech emphasizing the significance of trees in combating climate change and maintaining ecological balance.
2. Following the ceremony, participants dispersed across the designated areas to plant saplings. A total of 20 saplings were planted, including varieties such as neem, banyan, mango etc. which are known for their environmental benefits and are suitable for the local climate.
3. An awareness campaign was conducted parallel to the plantation activity. The NSS volunteers distributed pamphlets and interacted with the villagers, educating them on the benefits of tree plantation and encouraging them to take care of the planted saplings.
4. Instructions on the care and maintenance of the newly planted saplings were given to the villagers. The NSS unit also committed to regular follow-ups to ensure the saplings' growth and survival.

#### Impact

The tree plantation drive had a significant impact on both the environment and the community. The planted trees will contribute to improving air quality, conserving soil, and providing habitats for local wildlife. The involvement of students and teachers fostered a spirit of teamwork and environmental stewardship, inspiring them to undertake similar initiatives in the future.

### Report

**Introduction:** Everyone knows the importance of trees in our life. The same humans are destroying trees all over India in the name of infrastructure and development. Trees give us oxygen to breathe and to live a healthy life in a healthy atmosphere. Trees provide us oxygen, filter carbon dioxide, and prevent soil erosion, maintaining the ecological balance and many more. Also, they provide us food, shelter and many more things. Tree plantation is the process of transferring of seedlings from one place to another. We all have to take step for tree plantation to save our earth.

### Objectives:

16<sup>th</sup> November, 2021

As the Government had resolved to reopen the educational institution, after the precarious situation due to the Covid pandemic has come under control, the college authority notified regarding resuming its normal activities on 16/11/2021. The NSS unit already informed its volunteers to come on that day half an hour before and be prepared with proper instruments, like sanitizer spray bottle and masks to assist the students and the staff in getting sanitized before they enter the college building. The volunteers came to the college wearing mask following the Covid protocol. You have to keep distance from each other as much as possible. They sanitized the hands of the other students and the staff the moment they entered the college and provided them mask if someone was found without it.

A meeting was held at 1.00 pm in the seminar hall on the same day to discuss the other cleanliness programmes to be followed thereon. Dr. Bhabesh Pramanik, Principal of this college inaugurated the meeting and discussed in details the precautionary measures to be maintained now on.
