

Unity for Life: A Blood Donation Camp

18th March, 2023

Conducted By: National Service Scheme (NSS) Unit & NCC Unit, Dumkal College

Number of Blood Donor- 38

Number of Participant: 151

Description of the program:

The National Service Scheme (NSS) unit and NCC Unit of Dumkal College, in collaboration with Blood Bank Domkal Super Speciality Hospital, conducted a significant Blood Donation Camp on 18th March, 2023. This joint initiative aimed to address the critical need for blood while fostering a sense of community responsibility among the participants. Meticulous planning preceded the event, involving close coordination between the Dumkal College NSS unit and Domkal Super Speciality Hospital. The collaboration ensured the availability of medical professionals, equipment, and infrastructure, creating an environment conducive to successful blood donation.

The blood donation camp commenced at 11:00 AM and continued until 4:00 PM, drawing the active participation of students, faculty and staff. The joint effort between the college and the hospital facilitated a smooth process from registration to blood donation. A total of 38 donors willingly contributed, underscoring the success of the event.

Gratitude is extended to all participants, including the donors, volunteers, and medical professionals from both Dumkal College NSS unit and Domkal Super Speciality Hospital. Their collective efforts ensured the success of the blood donation camp.

Objective of the Event: The objective of a blood donation camp is to collect blood voluntarily from healthy individuals in order to meet the demand for blood and blood products in medical treatments, surgeries, emergencies, and various healthcare situations. Here are some specific objectives of organizing a blood donation camp.

1. To collect blood units but also to make students aware about blood and its benefits and to sensitize them to the need of donating blood to the needy in time.
2. It was an effort to motivate students to come forward and donate for this noble cause of helping others to breathe life with their precious donation.

3. First time donors need to be encouraged so that once the initial hesitation/ fear goes away, the donor will look forward to such camps in near future too.
4. To motivate all students to take a pledge to donate blood at least once in a year
5. To make the students aware of the scientific information about the blood group
6. To contribute, to some extent, to meet the excessive demand of blood as the surrounding community belongs to a very rural area and the local hospital does not have sufficient supply of blood bags.

Targeted community: As the surrounding community belongs to a very rural area and the local hospital does not have sufficient supply of blood bags, the blood collected in this camp would contribute to meet the demand to some extent. The students also can be benefitted from the same.
